Brand New Book ***** Print on Demand ***** Excerpt from The Health Exhibition Literature, Vol. 5: Health in Diet; Conferences; The Meat Supplies of This Country; The Adulteration of Food; Bee-Keeping Recent controversies over the spread and consequences of imported diseases among the live stock of this country have not unnaturally directed the attention Of enquirers into the present extent and the possible expansion of the meat supply of this country, while there is probably no question diiring the recent years of agricultural depression which has been more frequently agitated than the propriety and profitableness of meat production being attempted in this country on a larger scale than has been customary in the past epoch, when prices of corn were remunerative to the farmer. Before inviting discussion, therefore, on these points, it may be useful to make some endeavour to set out what is the probable amount of butchers meat furnished in one shape or another to the inhabitants Of the United Kingdom.
