Pub Date: 2012 Pages: GRIDS Xia Yong Publisher: Yellow River Conservancy Press National Vocational Mechanical and Electrical Specialty planning materials: high voltage technology National Vocational mechanical and electrical professional planning materials. completed the preparation of teaching the basic requirements of the Ministry of Education on vocational education and the National Water Resources and Hydropower vocational teaching and research will develop a high-voltage technology curriculum standards. Book covers dielectric insulating properties and test for the diagnosis of power system with two parts Overvoltage and Insulation. introduces the insulating properties of gas. liquid and solid media and high-voltage test techniques. over-voltage generated by physical processes and their protective measures. and the power system insulation coordination basic concepts appropriate to increase in recent years. high-voltage areas of new technology aspects. and focuses on the basic concepts of high voltage technology. the basic principle and the key issues in engineering applications. The book can be used as vocational electrical engineering and automation professional materials. as well as adult education High Voltage Engineering course materials. can also be used to do the college power majors of self-reference. as well as the power sector engineering and technical personnel reference book . Contents: Preface first dielectric insulation properties and test for the diagnosis of the first chapter of the gas medium insulating properties first section of charged particle generation and disappearance of two theories the third quarter of the gas discharge in the second quarter uniform electric field is uniform and slightly uneven gas discharge characteristics of the electric field is very uneven undertaking of four gas discharge characteristics of the electric field V lightning and switching impulse voltage breakdown characteristics of the air gap section...
