

Immunology Made Easy

By Antwi-Baffour, Samuel

Condition: New. Publisher/Verlag: Scholar's Press | A Focus on Acute Promyelocytic Leukaemia, Apoptosis, Phagocytosis and Systemic Lupus Erythematosis (SLE) | The teaching and learning of immunology has always been a difficult objective, but the experts in the field believe it can be an interesting area of study if people are taught in a manner that will give them a maximum understanding. One way of going round this problem is presenting lectures and other learning resources in a digested/watered down form. This way, people with limited science background could easily learn and understand the subject. This book is a compilation of lecture notes that span across four important topics in immunology namely: acute promyelocytic leukaemia, apoptosis, phagocytosis and systemic lupus erythematosis. In this book, every effort has been made to present the text in a lucid and readable style without sacrificing the important details. This book will therefore be of great interest and utility for students, researchers, teachers and doctors of medical and other allied sciences who want basic understanding of immunology. It is here to remove the fear of students for whom immunology has become a no go area. | Format: Paperback | Language/Sprache: english | 138 gr | 220x150x5...

Reviews

Absolutely essential go through ebook. It can be rally exciting throgh studying period of time. Its been written in an exceptionally simple way in fact it is only right after i finished reading this pdf where basically modified me, modify the way i believe.

-- **Iliana Hartmann**

Absolutely one of the best book I have ever study. It is actually writter in simple terms rather than confusing. I realized this pdf from my dad and i suggested this pdf to understand.
