Brand New Book ***** Print on Demand *****.Excerpt from Manures and Fertilizers: A Text-Book for College Students and a Work of Reference for All Interested in the Scientific Aspects of Modern Farming The preparation of this volume was undertaken for the purpose of meeting a distinct lack in collegiate agricultural textbooks in the United States. It was hoped to prepare a book reasonably free from extended details, such as are found in certain of the larger foreign works, and likewise to avoid the rather superficial treatment of the subjects which has necessarily characterized many of the books which have been written for the purpose of meeting the earlier requirements of the American agricultural colleges, and the present demands of agricultural high schools. The intent has been to provide in a measure for the needs of the graduate student in agriculture; also for the requirements of students in the agricultural colleges, teachers in agricultural schools, graduates of agricultural schools and colleges, agricultural institute lecturers, and the rapidly increasing number of intelligent men who are daily interesting themselves in the scientific phases of modern farming. In connection with the treatment of some of the newer and more controversial phases of certain of the topics, authorities have been cited freely, in order that the reader may readily pursue the subjects further, if desired. These citations have been introduced at the bottom of the respective pages, so as to permit of more convenient and ready reference than would be possible if they were placed at the ends of chapters, or at the end of the volume.
