GRIN Verlag GmbH Jun 2015, 2015. Taschenbuch. Book Condition: Neu. 210x148x2 mm. This item is printed on demand - Print on Demand Titel. Neuware - Seminar paper from the year 2013 in the subject Geography / Earth Science - Meteorology, Aeronomy, Climatology, , language: English, abstract: Implementation of a hurricane preparedness and response plan requires the coordinated efforts of multiple agencies from throughout the region. Utilization of effective team support produced very good results when applied with strategic management efforts built on an application of solid ethical principles. Understanding the importance of strong communication throughout the process allowed the team to produce superior results and build upon previous successes. The team was also cognizant that the experiences of the community and those that had gone through the process previously were important factors in allowing the current process to proceed in a positive fashion. Disaster preparedness is by no means an exact science. Despite this fact, there are ways to eliminate errors and provide an organization with the highest chance to reduce negative outcomes. This is achieved through experience and repetitive training designed to mimic potential scenarios that may be encountered. Analyzing previous successes and failures of the organization and other...
