Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Petition of Stephen R. Parkhurst, for Extension of His Patent for Ginning Cotton, and Burring Wool The machinery for taking the burrs and other foreign substances from wool, called burring machinery, is designed and adapted to be used both separately and in combination with a common carding machine. When used in combination with a carding machine, as it generally is, the burr cylinder is placed next the feed rollers, and, revolving with greater surface velocity than the feed rollers, draws the unburred wool from between them on to plain surfaces, between narrow, toothed, or serrated steel rings, placed upon a light, hollow, rigid, metallic cylinder, called a burr cylinder; the plain surfaces, being somewhat less in diameter than the serrated rings, allow the material to be drawn below the periphery of the steel rings on to the plain surfaces, and leave the burrs on top to be knocked off by a revolving guard over the burr cylinder into a trash receptacle in front. The wool, being thus freed from burrs, is stripped from the burr cylinder in the rear by a rapidly revolving card-clothed cylinder of the carding machine, and passes on through the machine in the ordinary process of carding. Previously to my invention, various attempts had been made, especially on burry wool, to devise some means whereby the burrs could be removed and the wool rendered serviceable for manufacturing purposes, but with only partial success. And at the time of the introduction of my machines into use, the old hand modes of picking the burrs from the wool by hand, or cutting them out with common sheep-shears, was generally resorted to. About the...
