

## Euclid s Elements of Geometry, the First Three Books (the Fourth, Fifth, and Sixth Books) Tr. from the Lat. to Which Is Added, a Compendium of Algebra (a Compendium of Trigonometry).

Filesize: 6.52 MB

### **Reviews**

*Very useful to all category of men and women. I actually have study and i also am certain that i am going to going to read through again once more down the road. Its been written in an exceptionally simple way and is particularly only soon after i finished reading this publication by which basically altered me, modify the way in my opinion.*

*(Dr. Sarai Fisher DDS)*

**EUCLID S ELEMENTS OF GEOMETRY, THE FIRST THREE BOOKS (THE FOURTH, FIFTH, AND SIXTH BOOKS) TR. FROM THE LAT. TO WHICH IS ADDED, A COMPENDIUM OF ALGEBRA (A COMPENDIUM OF TRIGONOMETRY).**

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1846 Excerpt: --12 in the second. Although I may have taken the equation  $f: r + 7 = 8x - 12$ , by chance, for to serve for example, it ought to be considered (likewise all those of which I shall speak) as coming from a problem of which we can always find an expression, by converting the equation into ordinary language. That of which we have spoken lastly shows how we may find a number such, that in adding 7 to  $f$  of itself, the sum will be equal to 8 times itself, minus 12. Similarly, the equation  $ax + be - ex = ac - bx$ , (in which the letters  $a$ ,  $b$ , and  $c$ , stand to represent known quantities, and  $x$  to represent unknown) answers to the following question: --To find a number ( $x$ ) such, that in multiplying it by a given number ( $a$ ), then adding the product of the two given numbers ( $b$  and  $c$ ), and taking away from this sum the product of the given number ( $c$ ) by the unknown term ( $x$ ), there may be a result equal to the product of the numbers  $a$  and  $c$ , minus that of the numbers  $b$  and  $x$ . To draw from an equation the value of the unknown quantities, or to have the unknown terms only on one side of the equation, and the known terms on the other, is what we call solving an equation. The known and unknown quantities can be expressed by any letters we wish, but the unknown are usually...
