Createspace, United States, 2014. Paperback. Book Condition: New. 279 x 216 mm. Language: English . Brand New Book ***** Print on Demand *****.The biggest news in China in 2012 was the leadership transition as Xi Jinping took over as President from Hu Jintao, and Li Keqiang took over as Premier from Wen Jiabao. What impact they will have on economic governance remains to be determined. The International Monetary Fund estimates that China's 2013 GDP growth will be 7.8 . The Chinese government's new leadership has acknowledged that the country's economic growth will slow going forward due to a number of internal and external factors, likely to the range of 7-7.5 in the short- to mid-term, but has not reacted with stimulus measures through the first half of 2013. Despite slowing GDP growth, which in 2012 was at the lowest level in 13 years, employment has remained stable, but weak profitability in certain sectors and continued external headwinds affecting export-oriented manufacturing may be cause for concern going forward. Inflation was at an annualized level of 2.6 in 2012, and has remained low through the first half of 2013. China's newly-installed economic policymakers have focused their rhetoric on achieving sustainable, high-quality growth versus fast growth, and transforming the country's economic growth model to have a greater focus on consumption, service sector development, and innovation. The government continues to list controlling residential real estate prices as a priority, but year-on-year house prices rose 4.3 across China in April 2013, and total credit expanded by 65 year-on-year in the first four months of 2013, with credit-to-GDP exceeding 200 by mid-2013, according to some analysts. The unprecedented expansion of credit is the result of stimulus measures undertaken by the government in 2008-2009 and 2012 to cushion a slowing economy. China...
