Reviews

This pdf is indeed gripping and exciting. It is written in easy words and phrases and not confusing. Once you begin to read the book, it is extremely difficult to leave it before concluding.

GLOBAL CLIMATE CHANGE AND NATURAL RESOURCES 2011: A ROBERTS ENVIRONMENTAL CENTER ANNUAL SNAPSHOT

Roberts Environmental Center, United States, 2011. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.For the past several years my students and I have been examining the state of global natural resources, particularly in light of global warming and climate change, each year producing a book similar to this one, but based only on scientific technical literature published within the past year. The books are similar in format, but entirely new in content-nothing in the current volume was known (at least in the sense of having been published in the peer-reviewed technical literature) before 2010. The gestation period of these books is very short by commercial publishing standards. The writing for this one was initiated at the end of January, 2011, and the final work was published and available for purchase at by the middle of May, 2011. Many of the scientific papers reviewed in it were published, or made available online in prepublication format, during the course of the writing. Most books cover material at least a year old. This one will be superseded by another, more recent one of ours by a year from now. If you are reading this before our next book comes out in May, 2012, you are reading material not likely to be found in most other books. Global warming and climate change are real and natural resources are becoming limiting. The global peak of oil production may already have passed, and certainly will be in the next two decades-as discussed in Chapter 1-and gasoline at the corner station here in Claremont is well over \$4.00/gallon again and going up daily. This week The New Yorker has an article about the massive new oil production in North Dakota, facilitated by hydrostatic fracturing of the...
