Excerpt from Cholecysto-Intestinal, Gastro-Intestinal, Entero-Intestinal Anastomosis and Approximation Without Sutures (Original Research) Mr. President and gentlemen Intestinal surgery occupies a very advanced place in the category of great surgical questions of the present day. Medical literature teems with reports of successful cases operated on, and not a few of the disasters are also placed on record. All over the world investigators are trying to solve the many perplexing problems that accident and disease of the gas tro intestinal tract present to them for consideration. That this subject has had such exhaustive consideration during the last decade, and that it is still a theme for spirited controversy and discussion, carries with it the implication that many vital points are yet unsettled and need further investigation, experimental and clinical. The results of experiments on lower animals have been conducive to great improvement, both in principle and technique of treatment of intestinal lesions in the human subject. Fair results are obtained in the treatment of bullet wounds of the intestines at present. At least an effort is made by the surgeon to repair the injury....
