Reviews

This book is definitely not effortless to start on reading through but extremely fun to learn. Better than never, though i am quite late in start reading this one. It is extremely difficult to leave it before concluding, once you begin to read the book.

FRAUD AND CARBON MARKETS: THE CARBON CONNECTION (PAPERBACK)

Taylor Francis Ltd, United Kingdom, 2015. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.The VAT Carousel Fraud has seriously undermined the financial integrity of the European Union Emissions Trading Scheme (EU ETS). This timely book is the first to give an overview of fraud in the carbon market. Written by a former broker, it presents unique material on the carbon fraud mechanics and analyses the missing trader fraud (VAT fraud) on European carbon allowances markets with a focus on financial and organised crime issues. Fraud and Carbon Markets: The Carbon Connection assesses the weaknesses of the Kyoto Protocol and environmental markets, using statistics as a forensic tool on the capital markets. It describes specific cases, the court investigations and various mechanisms. It addresses issues of money laundering and international fraud on capital markets, such as stock manipulation, by exploring the financial mechanisms of the fraud, their impact on the market behaviour and the consequences on their econometric features. Researchers and students in climate change policy, environmental finance, financial law, organised crime, forensic statistics, financial regulation and risk management as well as financial regulators and policy makers will find this book of great interest.
