Excerpt from The Reconstruction of the Pelvic Structures Incident to Lesions of Perineum The surgical anatomy of the male perineum may be said to have been practically demonstrated, and the subject long since exhausted. It is a sine qua non to the graduation of every medical student, and properly so, because of the importance of such knowledge in the practice of every-day life but if this is necessary to the proper consideration of diseases of the male, how much greater the need of a familiar and accurate understanding of the pelvic organs, their relationship, and supports, in the female!
