HIGH-RESOLUTION METHODS IN UNDERWATER ACOUSTICS

Springer. Paperback. Condition: New. 253 pages. Dimensions: 9.6in. x 6.7in. x 0.6in. One of the most challenging problems in electrical engineering is the detection and localization of target in underwater acoustics. In particular, bearing estimation is usually obtained by the classical array processing method, beamforming. High-resolution methods have been introduced to overcome the main limitation of beamforming, poor resolution. This volume is composed of tutorials and state-of-the-art research papers on high-resolution methods applied to underwater acoustics. Most of these papers are...
