

Mapping of Parent Hamiltonians: From Abelian and Non-Abelian Quantum Hall States to Exact Models of Critical Spin Chains

Filesize: 8.38 MB

Reviews

It is straightforward in read through better to recognize. I could possibly comprehend every little thing using this published e pdf. Its been written in an extremely basic way and is particularly merely following i finished reading through this ebook through which really transformed me, alter the way i believe.

Springer. Hardcover. Book Condition: New. Hardcover. 220 pages. Dimensions: 9.7in. x 6.5in. x 0.8in. This monograph introduces an exact model for a critical spin chain with arbitrary spin S , which includes the Haldane-Shastry model as the special case $S=1/2$. While spinons in the Haldane-Shastry model obey abelian half-fermi statistics, the spinons in the general model introduced here obey non-abelian statistics. This manifests itself through topological choices for the fractional momentum spacings. The general model is derived by mapping exact models of quantized Hall states onto spin chains. The book begins with pedagogical review of all the relevant models including the non-abelian statistics in the Pfaffian Hall state, and is understandable to every student with a graduate course in quantum mechanics. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Hardcover.
