Developing and Testing of a
Real-Time Scheduler for
Autonomous Energy

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | For embedded real-time systems that run on energy drawn from storage units (e.g. batteries) and furthermore the energy stored in those units is harvested from ambience (e.g. the sun) there is a major issue of energy availability for the processing unit to comply with all requirements. The problem, as one might imagine, is the instability of energy sources. The ideal situation is that whenever the operating system is active then it possesses...
