## DEVELOPMENT OF A PRECIPITATION-RUNOFF MODEL TO SIMULATE UNREGULATED STREAMFLOW IN THE SOUTH FORK FLATHEAD RIVER BASIN, MONTANA

CreateSpace Independent Publishing Platform. Paperback. Condition: New. This item is printed on demand. 50 pages. Dimensions: 11.0in. x 8.5in. x 0.1in. This report documents the development of a precipitation-runoff model for the South Fork Flathead River Basin, Mont. The Precipitation-Runoff Modeling System model, developed in cooperation with the Bureau of Reclamation, can be used to simulate daily mean unregulated stream-flow upstream and downstream from Hungry Horse Reservoir for water-resources planning. Two input files are required to run the model. The time-series data file contains daily precipitation data and daily minimum and maximum air-temperature data from climate stations in and near the South Fork Flathead River Basin. The parameter file contains values of parameters that describe the basin topography, the flow network, the distribution of the precipitation and temperature data, and the hydrologic characteristics of the basin soils and vegetation. This item ships from La Vergne, TN. Paperback.
