Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from *The Origin of the Chemical Elements and of Cell Life* Hugo De Vries, Professor of Botany in the University of Amsterdam, says in his work, *Species and Varieties - Their Origin by Mutation*, The probabilities are now greatly in favour of our finding out the causes of evolution by a close scrutiny of what really occurs in nature. A persistent study of the physiological factors of this evolution is the chief condition of success. To this study, field observations may contribute, as well as direct experiments, microscopical investigations, as well as extended pedigree cultures. The co-operation of many workers is required to cover the field. Somewhere, no doubt, the desired principle lies hidden, but until it is discovered all methods must be tried. A very slight indication may change forever the whole aspect of the problem. It was through field observations that the writer s interest in scientific research was first awakened. Having undertaken the preparation of material for the furtherance of Nature Study in the schools of Canada, such as *Birds of Canada, in Relation to Agriculture* (published 1908), *The Wild Animals of Canada*, *The Wild Flowers of Canada*, and *The Fishes of our Canadian Waters*, at the request of the Minister of Education of the Provincial Government, in the form of Pictorial Charts, a very careful study of the classification of the different forms of life was necessary. The evidence of fixed numbers and their multiples in determining the division and subdivision of the different forms of life, forced the conclusion that only by regarding science indivisible in all its branches, can its great truths be rendered discoverable. The wonderful achievements of specialization...
