Deflection Board.--A device for determining the algebraic sum of the deflection corrections for wind, drift and travel of target during the time of flight and the predicted interval. It is used to determine the reference numbers for the deflection scale of the sight in Case I and II, and the azimuth correction reference number in Case III; and, for mortars, the corrected azimuth. Deflection Scale.--A scale provided on sights, graduated in degrees or mils for the purpose of laying the piece in direction or obtaining and applying correction for deflection. Degree.--One. three-hundred-and-sixtieth part of a circumference. Thus 90 degrees make a right angle. Delivery Table.--The hoist table from which the projectiles are delivered to the ammunition trucks. Density of Loading.--The ratio of the weight of the powder charge to the weight of a volume of distilled water at the temperature...
