

## Analysis on MHD Free Convection Flow Within Trapezoidal Enclosures

By Muhammad Sajjad Hossain

LAP Lambert Academic Publishing Apr 2014, 2014. Taschenbuch. Book Condition: Neu. 220x150x4 mm. Neuware - Free convection in trapezoidal enclosures has received considerable attention because of its importance in several thermal engineering problems, for example, in the design of electronic devices, solar thermal receivers, uncovered flat plate solar collectors having rows of vertical strips geothermal reservoirs etc. In my work the title named Analysis on MHD Free Convection Flow Within Trapezoidal Enclosures has been studied. In this study, free convection within a trapezoidal enclosure for uniformly heated bottom wall, insulated top wall and isothermal side walls with inclination angles ( $\phi$ ) are considered. Heat flow patterns in the presence of natural convection within trapezoidal enclosures have been analyzed with heatlines concept using magnetic effect. The fluid is concerned for the wide range of Rayleigh number ( $Ra$ ) from  $10^3$  to  $10^7$  and Prandtl number ( $Pr$ ) from 0.026, 0.7, 1000 and Hartmann number ( $Ha$ ) with various tilt angles  $F = 45^\circ, 30^\circ$  and  $0^\circ$  (square). The computational results indicate that the average and local Nusselt number at the uniform heating of bottom wall of the enclosure is depending on the dimensionless parameters. 72 pp. Englisch.

### Reviews

*A very wonderful pdf with perfect and lucid explanations. This can be for those who state that there had not been a worth reading. Once you begin to read the book, it is extremely difficult to leave it before concluding.*

-- **Mr. Stone Kunze**

*Extensive guide! Its this kind of excellent read through. it absolutely was writtern very perfectly and helpful. Your way of life period is going to be change when you complete reading this ebook.*
