

## Brain Training Sight Words Grades 1 - 3: A Whole Brain Approach to Reading (Paperback)

Filesize: 2.11 MB

### Reviews

*Simply no terms to clarify. It is actually loaded with knowledge and wisdom I am just delighted to let you know that this is the very best publication i have got read through during my individual lifestyle and could be he very best pdf for actually.*

*(Mr. Caleb Quigley MD)*

## **BRAIN TRAINING SIGHT WORDS GRADES 1 - 3: A WHOLE BRAIN APPROACH TO READING (PAPERBACK)**

Createspace Independent Publishing Platform, 2016. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Brain Training consists of programs designed to improve brain processing speed, hemispheric integration between the right and left brain, internal brain timing and sequencing. The exercises in this book are one method of hemispheric integration. While the right brain identifies the color, the left brain is utilized to read the numbers and words. As each exercise is done, the right and left brain must communicate to complete the task. This encourages the neurons to connect. Neurons that fire together wire together. Therefore, the more the exercises are done the stronger the neural connections, the quicker the brain responds. Pairing brain training with sight words is a natural way to make a difficult task easier. Reading difficulties can often be a result of left brain weakness. Using brain training exercises with sight words engages the right brain to assist with the task. It also benefits the student by improving memory, sequencing and brain processing speed. The results are often remarkable. Struggling students learn the material quicker and easier. They retain the information and have faster recall, resulting in higher academic achievement, better test scores and school success.
