Midwestern by-product coke ovens require annually millions of tons of high volatile bituminous coals Which are shipped from the Appalachian coal fields in West Virginia, Pennsylvania, and eastern Kentucky. Illinois has larger reserves of high-volatile bituminous coals than any other state east of the Rockies. Though the Appalachian coals are principally of higher rank than the midwestern, the reserves of these high-rank coals are being depleted rapidly. Because of this and the present critical transportation problem, the Illinois State Geological Survey, aided by the Office of Production Research and Development, War Production Board, initiated a research program to study the problem of substituting mid western coals for a portion of the eastern high-volatile coals now being carbonized in midwestern coke ovens. Previous commercial and semicommercial experience has shown that metallurgical coke can be made from certain Illinois coals. The research program includes the design, construction, and operation Of a pilot-size coke oven to duplicate carbonizing conditions in commercial slot-type ovens. A slot-type pilot-size coke oven of soo-pound coal capacity, electrically heated to ensure...
