The conference took place in Trier the oldest town in Germany, with more than 2 millennia of history. Previous symposia of the series were held in Paris (1984), Saarbrücken (1985), Orsay (1986), Passau (1987), Bordeaux (1988), Paderborn (1989), Rouen (1990), Hamburg (1991), Cachan (1992), Würzburg (1993), Caen (1994), München (1995), Grenoble (1996), Lübeck (1997), and Paris (1998). All proceedings of the series have been published in the Lecture Notes of Computer Science series of Springer-Verlag. STACS has become one of the most important annual meetings in Europe for the theoretical computer science community. This time, altogether 300 authors from 36 countries on 6 continents submitted their papers. Each submission was sent to 5 members of the program committee for review. During the program committee session 51 out of the 146 submissions were accepted for presentation. In two of the selected papers the same result was proved independently. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.
